

Ideation Phase

Empathize & Discover

Date	27-06-2026
Team ID	23A51A05G8
Project Name	Software Installation Request Automation
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple visual tool that helps understand the needs, behaviours, emotions, and expectations of employees requesting licensed software installations. It enables teams to identify user pain points and design an efficient ServiceNow-based request process. Creating an effective solution requires understanding the real challenges faced by employees and IT teams, resulting in a faster, transparent, and user-friendly software installation workflow.
